

# CAR PARK 2021/

## New-build Car Park P4, Nürnberg Airport

Nürnberg Airport operates multi-storey car parking alongside surface parking facilities.

The construction of the P4 multi-storey car park is intended to take into account, on the one hand, the loss of parking space due to the foreseeable demolition of the P1 multi-storey car park and, on the other hand, the expected future need for parking spaces due to increasing passenger numbers.

The Car Park has 8 parking levels and offers space for 3,611 vehicles. The individual parking levels are accessed via two curved ramps. The ramps were built using in-situ concrete with asphalt covering in order to minimize future maintenance.

AMP was commissioned with the Car Park concept, the preparation of tender documentation, together with a service program and technical controlling procedures.
